Everything You Need to Know About UK Telephone Numbers

Numerical List of UK National Dialling Codes

Overleaf is a list of all the geographic National Dialling Codes (also known as area codes) in the UK, as administered by Ofcom, displayed in numerical order. You can view an alphabetical list [here](#).

Traditionally callers dialling within a code area have not had to dial the code before the local number. However, in a small number of areas the ability to dial just the local number has been removed in order to increase number capacity. This is because numbers starting with 0 and 1 after the code can then be used, freeing up another 200,000 numbers. As it is, more and more calls are being made on mobiles rather than landlines these days requiring the full number to be dialled. Furthermore, the replacement of traditional PBX lines with VOIP lines (where the telephone is connected to a box connected to your router/directly to the router or to a business VOIP system) which do not normally support local dialling means that local dialling will probably eventually be removed altogether. In the table overleaf area codes with no local dialling are shown as "All fig" instead of the number of digits.

Unlike other code lists, we only show you the figures contained within the actual code and no additional numbers, but we also show you the number of digits for local numbers within these areas. This makes it easier for you to understand the correct format for these numbers.

UK National Dialling Codes - Numerical List

Code	Area Name	County	Region	Figures
0113	Leeds	West Yorkshire	Yorkshire and the Humber	7 fig
0114	Sheffield	South Yorkshire	Yorkshire and the Humber	7 fig
0115	Nottingham	Nottinghamshire	East Midlands	7 fig
0116	Leicester	Leicestershire	East Midlands	7 fig
0117	Bristol	Avon	South West	7 fig
0118	Reading	Berkshire	South East	7 fig
01200	Clitheroe	Lancashire	North West	6 fig
01202	Bournemouth	Dorset	South West	All fig
01204	Bolton	Lancashire	North West	5 & 6 fig
